Middle States Commission on Higher Education
University at Albany – Self-Study Design

September 5, 2018
I. Institutional Overview

Located in New York’s capital city, the University at Albany is the premier public research University in the Capital Region and offers more than 17,000 students the expansive opportunities of a large university in an environment designed to foster individual success. Students choose from over 150 undergraduate programs and more than 125 graduate programs that prepare them to succeed in a wide range of fields. In every area of study, students are instructed by faculty who are world-class scholars and teachers — many actively engaged in life-enhancing research that contributes profoundly to the public good. As mentors, they provide numerous experiential learning opportunities at both the undergraduate and graduate levels, inspiring students to advance their skills and aspirations.

The University’s programs operate across three primary locations in and around the Albany area. The Uptown Campus, the University’s main campus, is located at 1400 Washington Avenue in Albany; the Downtown Campus is located at 135 Western Avenue in Albany; and the Health Sciences Campus, a former pharmaceutical complex purchased in 1996, is located at One University Place in Rensselaer. While geographically distributed, these locations serve as and operate as components of a single educational institution, with students, faculty, and staff moving seamlessly between the campuses throughout the day.

Following a robust and participative process, the University created a new, visionary strategic plan during 2018. President Rodriguez’s charge was simple: work collaboratively to lead this effort with an unwavering emphasis on our students’ success; after all, everything we do at the University at Albany should contribute to their success. Armed with five core priorities, the University set out to support the creation of a plan to achieve this imperative. The plan’s goals were developed by five priority workgroups, populated by the members of the 110-person strategic planning committee, which included undergraduate and graduate students, faculty, and staff, each led by tireless co-chairs. Once the initial draft was created, the co-chairs of the strategic planning committee set off on 30 separate “Road Show” stops across the University’s schools, colleges, administrative units, and shared governance groups collaborating with more than 1,000 campus stakeholders.

The University at Albany is now a mid-size, urban, data-driven institution in a public system of higher education proud to be one of the most diverse research universities in the country. We are one of the four primary research centers in the 64-campus State University of New York system. Our history makes us the oldest public teachers college in the state and we have evolved a dynamic, forward-looking academic portfolio, as demonstrated by significant recent additions, including a new College of Engineering and the first-in-the-nation College of Emergency Preparedness, Homeland Security, and Cybersecurity. Our new mission statement and strategic plan, noted below,
Institutional Priorities to be Addressed in Self-Study

Under its current leadership, the University at Albany has recently concluded the development portion of a strategic planning effort. This plan, and its core priorities, will guide the University for the next five years. That process also led to development of a new mission and vision to guide the university:

**Mission**

The University at Albany is an engine of opportunity. Fueled by our unique mix of academic excellence, internationally recognized research, and world-class faculty, we relentlessly pursue possibilities, create connections, and open opportunities—locally and globally—with a single-minded purpose: To empower our students, faculty, and campus communities to author their own success. This is the University at Albany.

**Vision**

To be the nation’s leading diverse public research university—providing the leaders, the knowledge, and the innovations to create a better world.

As noted in our vision statement, the University strives to be the nation’s leading diverse public research university, providing all students, including those from disadvantaged background, with academic opportunities at both the undergraduate and graduate levels. This necessitates recruiting and retaining a faculty that is reflective of the students who we serve as well as investing in the development of our inclusive excellence. We strive to build an academic community that is welcoming, supportive, and sustaining of a diverse array of people and ideas. This priority is more than simply diversifying our academic profile, it is about providing pathways for all students, including those individuals from diverse, disadvantaged, and under-represented backgrounds to move into careers, from education to engineering, to better reflect the rapidly changing demographics of our country. Therefore, these efforts include ensuring that all of the students we accept into the University have the support necessary to be successful in their academic pursuits as well as assisting them in being successful in their careers beyond the university.

Indeed, a second priority area focuses on student success. By promoting academic achievement and personal growth, we will prepare UAlbany students to succeed in their careers and in all aspects of their lives as engaged citizens. We strive to enhance the student experience in and out of the classroom through innovative teaching, collaborative support services, and programs that promote student engagement, learning, and well-being. As a part of our focus on post-graduation success, the University is particularly committed to becoming one of the nation’s leading providers of experiential learning opportunities. The University has invested in building out an infrastructure to support experiential learning, including a new academic Center for Experiential Learning, partnered with innovated programs that provide students with real-world experiences, and has begun to develop academic programs (e.g., cybersecurity) with significant experiential learning required as part of the academic course of study. We have also supported new research projects that are seeking
to help us better identifying which learning experiences have the most significant impact on post-graduation career success.

A defining characteristic of the university is that our teaching and learning takes place within the context of UAlbany being a research focused institution. As such, a third priority is to strengthen our research, scholarship, and creative pursuits, with a focus on addressing societal challenges, advancing human knowledge, and driving innovation and discovery. A central aspect of this priority area is to sustain and grow the existing areas of inquiry within the institution; but also to develop the infrastructure needed to enhance research and scholarly collaboration among faculty across departmental/divisional boundaries. The University has invested in this priority in many ways including the recent launch of the Center for Undergraduate Research and Creative Engagement (CURCE) providing opportunities for the development of research skills and research experience for all students across our campus. We know that some of the greatest threats confronting humankind necessitate expertise from multiple academic perspectives, and UAlbany should be at the forefront of facilitating and growing such research efforts.

The University has also had a long and enduring commitment to preparing our students to be globally engaged citizens. Alongside this commitment, we also want to expand UAlbany’s international visibility and impact. Indeed, the university has one of the largest offerings of academic-based study abroad programs in the country and many of its programs have deep international ties and expertise. As part of this priority area, the university seeks to build upon its long-standing commitments in these areas to enhance internationalization of the campus by integrating global perspectives into the curricular and co-curricular academic experiences of as many students as possible in addition to increasing the number of education abroad opportunities of students. In addition, the university will seek to build strategic, strong, high quality partnerships with foreign institutions, organizations, and governments that align with and can help advance the university’s existing academic and research thrusts.

As the only public, Research University in New York’s capital, we believe that we have a commitment to fostering the vitality of our local community as an economic driver and as a social and cultural anchor of the region as well as being actively engaged in the state, nation, and world. Through this fifth priority, the university strives to support and develop publicly engaged scholarship and research opportunities that address societal challenges through collaborative networks of scholars and practitioners. The University at Albany will serve all of our relevant communities – local to global – by being a research university that focuses on translational scholarship, utilizing venues to ensure that the public is informed by our research, and actively engaging community members in meaningful and transformative activities.

Finally, we are a University that has long striven to be the best at getting better. UAlbany is proud of its lengthy focus on the use of data and assessment to inform decision making. The University has a long history of conducting academic assessment, from measuring student learning outcomes to comprehensive program reviews. This past year, the University added a formal process for administrative assessment to its assessment initiatives. Each administrative unit (over 100) has completed a matrix that identifies their mission and vision as well as a series of measurable goals. An Administrative Assessment Committee reviews the units’ submissions and provides feedback to each unit head. A separate administrative program review process is also being conducted under this new initiative. Each vice president and dean’s office will complete a thorough, data-driven self-study, which is then submitted to an Administrative Assessment Committee designated by the
President for review and feedback. These administrative self-studies are being phased in over the next five-years across all deans’ offices and vice presidential areas and will be discussed in detail in our Middle States self-study.

II. Intended Outcomes of the Self-Study

The University at Albany looks forward to engaging in the self-study process. The timing of the review is optimal as it comes at the beginning of our new strategic plan implementation and will provide an opportunity for both retrospection and forward thinking that will be necessary for the university to advance its five core priorities. Our intended outcomes for the self-study process include the following:

- Continued engagement of the institutional community, including both internal and external stakeholders, in a comprehensive and transparent self-appraisal process.

- Critically examine past activities and how they inform our current reality, as well as shape a future direction of the university based on the five core priorities of the strategic plan.

- Focus on continuous improvement in the attainment of the institution’s mission, vision, and institutional priorities.

- Demonstrate how the University at Albany currently meets Middle States Standards for Accreditation, Requirements of Affiliation, and Verification of Compliance with Accreditation-Relevant Federal Regulations.

III. Self-Study Approach

Identify one of the following self-study approaches to be used to organize the Self-Study Report:

- Standards-Based Approach
- Priorities-Based Approach

Following discussion after attending the Commission’s fall 2017 self-study workshop, it was decided that the most appropriate approach for the University at Albany is the standards-based approach. While we will focus on the priorities set forth in the university’s new strategic plan, we believe that the standards-based approach will allow for a more comprehensive process, which will be important for helping strengthen the entire the university.
IV. Organizational Structure of the Steering Committee and Working Groups

The Self-Study process will be guided by a steering committee and work groups comprised of diverse groups of faculty, students, staff, and administrative leaders. We purposefully designed the working groups to ensure that different backgrounds, administrative duties, length of service at UAlbany and disciplinary perspectives are represented. Each work group includes representation from faculty, students, and staff.

The self-study effort is led by Steering Committee co-chairs Dr. Jeanette Altarriba, Vice Provost and Dean for Undergraduate Education and Professor of Psychology, and Collins Fellow, and Dr. Jason Lane, Interim Dean of the School of Education, Associate Professor of Educational Policy & Leadership, and Executive Director of SUNY’s SAIL Institute for Academic & Innovative Leadership. The Committee will be supported in its work by Dr. Bruce Szelest, Chief of Staff and Mr. Jack Mahoney, Director of Institutional Research, Planning, and Effectiveness.

The Steering Committee is comprised of the four individuals listed above and the two co-chairs for each working group.

The seven working groups are structured around the seven standards. The working group leaders were selected by the Steering Committee co-chairs, in consultation with the President and Provost, based on the individuals’ deep and relevant experience in their workgroup’s area of focus. The workgroup co-chairs were then invited by the President to serve in this role.

University faculty and staff were invited by President Rodríguez to volunteer for the workgroup of their choice, and Drs. Altarriba and Lane, with input from the workgroup co-chairs, constructed the membership of each from those who volunteered or who were nominated based on their academic or professional expertise. In addition, each workgroup contains a designee from our faculty governance body, the University Senate. With the fall semester just beginning, we are in the process of adding designees of the undergraduate and graduate student governance bodies to each workgroup, and will fill those positions, in consultation with the undergraduate Student Association and Graduate Student Association presidents, as students return to campus for the beginning of the fall semester.

Each workgroup is supported by professional staff familiar with the Middle States standards of accreditation relevant to that workgroup. Additionally, a graduate assistant will be assigned to each workgroup to assist with staffing responsibilities.

The workgroups, and their members (including position and focus) follow:

**Standard I – Mission and Goals**

- **Steven Messner**
  - Distinguished Professor
  - Sociology Department *(Co-Chair)*

- **James Mower**
  - Associate Professor and Chair of the University Senate
  - Geography and Planning *(Co-chair)*

- **Courtney D’Allaird**
  - Assistant Director
  - Intercultural Student Engagement
University at Albany Self-Study Design

Standard I – Mission and Goals – continued

Ashley DelSignore  Sr. Manager Content Marketing and Strategy  Marketing Services
Satyendra Kumar  Associate VP for Research  Grants Development
Debernee Privott  Assistant Dean for Public Engagement, CAS & Director, UHS  University in the High School
Latonia Spencer  Director  Office of Student Accounts
Christopher Thorncroft  Professor and Chair  Atmospheric and Environmental Sciences
Undergraduate Student  Kaylynn Enright
Graduate Student  TBD
Alice Oldfather  Assistant to the President for Strategic Communication  Office of the President (Staff to workgroup)
Graduate Assistant  TBD (Staff to the Workgroup)

Standard II – Ethics & Integrity

James Acker  Distinguished Professor and Collins Fellow  Criminal Justice (Co-Chair)
Kevin Wilcox  Associate VP and Controller  Finance and Administration (Co-Chair)
Mary Gallant  Professor, Sr. Associate Dean for Academic Affairs  School of Public Health
Carol Jewell  Serials Copy Cataloger  University Libraries
Ewan McNay  Assistant Professor  Psychology
Terrell Rabb  Regulatory Affairs Administrator  Office of Regulatory and Research Compliance
Randy Stark  Associate VP for Human Resources  Human Resources Management
Undergraduate Student  TBD
Graduate Student  TBD
Nancy Lauricella  Executive Director  Community Standards (Staff to workgroup)
Graduate Assistant  TBD (Staff to workgroup)
### Standard III - Design and Delivery of the Student Experience

V. Organization of the Self-Study Document

At this juncture we envision the following structure to the self-study. Each chapter of the report is described below along with the templates provided to the working groups. Each workgroup is asked to critically examine the extent to which the University meets the standards of accreditation and relevant requirements of affiliation, as well as to analyze the University’s assessment practices across its operations and delivery of academic programs.

All workgroup recommendations and suggestions for improvement that appear in the self-study must be evidence-based, with notable examples provided, as appropriate, and with reference to the evidence inventory. Appendix A contains the templates provided to each workgroup which indicate the standards of accreditation and requirements of affiliation that they are to analyze. Appendix A also provides a crosswalk matrix that indicates which requirements of affiliation are covered by which workgroup. The University at Albany’s self-study will have the following organization.

Introduction

Executive summary

Chapter 1: A new vision for the University at Albany: Stability and Strategy. This chapter provides an overview of the self-study process, documents the transition in leadership, and provides information on new and relevant initiatives that affect the University’s current and future opportunities.

Chapter 2: Advancing UAlbany’s Mission: This chapter describes the university’s strategic planning process and implementation and documents how UAlbany is in compliance with Standards 1 and 2.

Proposed outline for the first half of Chapter 2, to be completed by Workgroup 1, is as follows:

• Recent 2018 UAlbany Strategic Planning Process:
  o Five core priorities established by the university’s new president
  o Note the 110-person strategic planning committee, including faculty, staff, and students
  o 30 different “road shows” in which co-chairs circulated across the entire campus to conduct presentations and obtain direct feedback regarding draft mission and goals
  o Collaboration with over 1,000 campus stakeholders
  o Suggest the workgroup interview the co-chairs of the strategic planning committee

• Goals and objectives are used to drive the institution:
  o planning matrices with specific unit level goals
  o funding attached to goals
  o provides allocation and accountability

• Other items to review:
  o Base Incremental Budget
  o Compact planning process
Proposed outline for second half of Chapter 2, to be completed by Workgroup 2, is as follows:

- A commitment to academic freedom, intellectual freedom, freedom of expression, and respect for intellectual property rights;
- A climate that fosters respect among students, faculty, staff, and administration from a range of diverse backgrounds, ideas, and perspectives;
- A grievance policy that is documented and disseminated to address complaints or grievances raised by students, faculty, or staff. The institution’s policies and procedures are fair and impartial, and assure that grievances are addressed promptly, appropriately, and equitably;
- The avoidance of conflict of interest or the appearance of such conflict in all activities and among all constituents;
- Fair and impartial practices in the hiring, evaluation, promotion, discipline, and separation of employees;
- Honesty and truthfulness in public relations announcements, advertisements, recruiting and admissions materials and practices, as well as in internal communications;
- As appropriate to its mission, services or programs in place:
  - to promote affordability and accessibility;
  - to enable students to understand funding sources and options, value received for cost, and methods to make informed decisions about incurring debt;
- Compliance with all applicable federal, state, and Commission reporting policies, regulations, and requirements to include reporting regarding:
- The full disclosure of information on institution-wide assessments, graduation, retention, certification and licensure or licensing board pass rates;
- The institution’s compliance with the Commission’s Requirements of Affiliation;
- Substantive changes affecting institutional mission, goals, programs, operations, sites, and other material issues which must be disclosed in a timely and accurate fashion;
- The institution’s compliance with the Commission’s policies; and
- Periodic assessment of ethics and integrity as evidenced in institutional policies, processes, practices, and the manner in which these are implemented.

With an examination of the following specific elements:

- Faculty handbook
- Staff handbooks
- Student grievance policies
- Conflict of interest policies, including who must sign which documents
- Approval policy for creating new policies
- Policy for evaluating and approving contracts
University at Albany Self-Study Design

- Hiring and promotion policies and procedures
- Policies for assessing risk
- Verification of compliance with IPEDS and other mandatory federal and state data submissions (particularly those not covered by the MSCHE Verification of Compliance with Accreditation-Related Federal Regulations)
- Location of websites and reporting information containing reporting of Student-Right-to-Know Act data

Chapter 3: UAlbany Students: Forever Great; Forever Great Danes: This chapter documents compliance with Standards 3 and 4. The chapter provides an overview of the characteristics of the University’s student body and the current efforts by the university to enhance the student learning experience by more effectively using data analytics and providing new opportunities for students to engage in experiential learning opportunities that complement their coursework.

Proposed outline for the first half of Chapter 3, to be completed by Workgroup 3, is as follows:

- The UAlbany Educational Experience
  - What is the UA educational experience?
  - Unique aspects (i.e., writing intensive)
  - Scheduling
  - General Education (design and assessment)
  - Experiential Learning
    - International
- The Undergraduate Programs
- Graduate Programs
- Online Education
- Faculty Quality and Composition
- Faculty review processes
- SIRF data (Student Instructional Rating Form)
- Support of Academic Progress (will need to be coordinated with standard 4)
- Academic Program Approval and Assessment
- Governance process for approval of the curriculum (UAlbany, SUNY, NYS Education Dept)
- Academic Program Review Process
- Student Learning Outcomes and the

Proposed outline for the second half of Chapter 3, to be completed by Workgroup 4, is as follows:

- Supporting Undergraduate Student Success
  - First-year experience programs
  - Living-Learning Communities
  - Writing and Critical Inquiry program
  - EOP
  - Freshman Seminars
  - Honors College
  - Academic policies, enforcement, and their adaptability to student needs
  - UAlbany’s advisement model
University at Albany Self-Study Design

- Tutoring programs
- Internships and experiential learning initiatives
- Student Affairs support programs and activities

- Student Success in Graduate Programs
  - Support functions of the Office of Graduate Studies
  - Degree clearance
  - Academic policies and their enforcement
  - GATA support
  - Other initiatives to support student success in graduate education?

- Support of other educational activities
  - Online learning
  - University in the High Schools program

Chapter 4: Fostering an Environment of Continuous Improvement: This chapter documents compliance with Standards 5 and 6. It describes the ways in which the institution engages in assessment of learning outcomes and ensures that it’s planning, resources, and structures are aligned to achieve the mission and goals of the institution.

Proposed outline for the first half of Chapter 4, to be completed by Workgroup 5, is as follows:

- Institutional, Program, and Course-based Learning Goals
  - Albany’s approach to setting and periodically reviewing learning goals at these levels.

- Assessment of Undergraduate Student Learning
  - Assessment in the Major
  - General Education Assessment
  - Assessment of the University in the High Schools program

- Assessment of Student Learning in Graduate Programs
  - Master’s and Certificate Programs
  - Doctoral Programs
  - Use of Graduate Program Evaluation Metrics Developed Under the 2010 Strategic Plan

- Reflections on UAlbany’s Student Learning Assessment Processes
  - Challenges
  - Significant Accomplishments
  - Suggestions for Strengthening our Assessment Processes

Proposed outline for the second half of Chapter 4, to be completed by Workgroup 6, is as follows:

- Introduction to reference back to Chapter 2, Mission and Goals
- Institutional Improvement
  - Existing survey activities (NSSE, SOS)
  - Academic program review
  - Administrative unit assessment
University at Albany Self-Study Design

- Program review process
- Assessment of student learning (in the major, and Gen Ed)

- UAlbany Planning Processes
  - Base Incremental Budget
  - 2020 MOU planning process
  - Compact planning process
  - New Strategic Plan and Action Plans
  - Facilities
  - Technology master plan
  - Online Teaching & Learning
  - Budget preparation: Call for allocation plans
  - Department profiles and use of analytics in budget planning

- Resource Allocation (How do we actually do this, how effective are we?)
  - Standard budget allocation process (forms, communications, process description, etc.)
  - Compact Planning Process
  - SUNY 2020
  - PIF
  - Role of faculty governance

Chapter 5: Governing the University at Albany: This chapter document compliance with Standard 7 by describing the structure of the governance and administrative structure within the institution and the degree to which they satisfy the standards and position the University to pursue its mission, vision, and key priorities.

Proposed outline for Chapter 5, to be completed by Workgroup 7, is as follows:

- Introduction – Provide an overview of UAlbany’s administrative and governance structures, and their relationship with SUNY System Administration.
- Role of the SUNY System
  - Benefits (might be able to tackle the requirement of affiliation (#1) here)
  - Challenges
- Campus Governance and Administration
  - Structure and Functioning of the Administrative Leadership
  - Faculty Governance Organization and Responsibilities
- Assessment of Governance, Leadership, and Administration
  - Assessment of Administrative Units (focus on process, but also show how results used, if possible)
  - Assessment of Governance Processes
  - Overall Assessment of Institutional Effectiveness
- Institution-wide surveys
- IRPE assessment reports

Closing Summary
University at Albany Self-Study Design

Our working groups will be asked to provide a brief summary of institutional challenges, significant achievements, suggestions, and recommendations as regards the content of their section.

VI. Verification of Compliance Strategy

The University will use the templates and resources provided by the Commission to provide evidence and substantiation of Verification of Compliance with Accreditation-Relevant Federal Regulations. Responsibility for collecting the evidence and reporting findings will be led by Mr. Jack Mahoney, Director of Institutional Research, Planning, and Effectiveness, along with support from the following:

- Ms. Karen Chico-Hurst, Registrar
- Dr. Peter Shea, Associate Professor, Educational Theory and Practice
- Mr. Steve Kudzin, Director of Financial Aid
- Dr. Michael Christakis, Vice President, Student Affairs
- Ms. Janet Thayer, Senior Counsel

VII. Evidence Inventory

The University’s evidence inventory is under construction as of this writing. It will be uploaded to the Middle States review team portal at a later date. It will be constructed from the documents that the Office of Institutional Research, Planning, and Effectiveness, along with the each workgroup, are now constructing and collecting on the University’s internal wiki page. Specifically, each workgroup’s self-study chapter outline is now posted to a wiki page in tabular form along with internal web links to the data and evidentiary documents that allow the workgroup to analyze the University’s compliance and assessment activities. All workgroup recommendations and suggestions for improvement that appear in the self-study must be evidence-based, with notable examples provided, as appropriate, and with reference to the evidence inventory.

**Evaluation Team Profile**

The University at Albany, State University of New York is a mid-size, urban, data-driven institution in a public system of higher education that strives to be one of the most diverse research universities in the country. UAlbany provides students a mix of rigorous academic experiences complemented by meaningful co-curricular and experiential learning.

It is desirous to construct an evaluation team that collectively would understand the characteristics of the University, in terms of situational contexts (e.g., geographic location in a capital city, distributed physical footprint – three locations across the city, close proximity to a major urban setting – NYC, and existence within a public system of higher education – SUNY). Additionally, the team should understand its organizational characteristics such as being a community engaged, data-driven, and highly-diverse research institution that serves both an undergraduate and graduate populations.

Moreover, our history makes us the oldest public teachers college in the state; but we also continue to evolve a dynamic, forward-looking academic portfolio with significant recent additions, including a new College of Engineering and the first-in-the-nation College of Emergency Preparedness, Homeland Security, and Cybersecurity.

As we survey the higher education landscape, the University of Maryland – Baltimore County often arises as an institution with similar history, trajectory, and is identified as being a highly diverse, research university.

Suggestive criteria for selecting external peer evaluation group members.

- From public research universities, preferably within Carnegie Classification “Research Universities – Highest Research” category
- From colleges/universities with strong commitment to serving an extremely diverse population of students
- From colleges/universities with a solid commitment to experiential learning
- From institutions that exist in or near an urban setting
- From institutions with experience using data to drive student success and inform strategic decision-making
- From institutions with a commitment to quality undergraduate and graduate programs.
