Plan Your DIY Video

Determine a key objective for the video.

Identify essential concepts, relationships, and/or processes to include.

Plan visual content to clearly represent these concepts, relationships, and processes.

Plan a thorough script explaining all of the above including the visual representations.

Note that to be accessible, all visual content must be high contrast and included in the captions (or audio descriptions).

Create Your DIY Video

Make a portable recording (mp4, mov).

Edit it as desired (optional).

Post the video with closed captions (required in order to be accessible).
