Number of members in a team	10,000
Number of channels per team	200
Number of Private channels per Team	30
File upload limit	15 GB

Meetings and calls

Feature	Maximum limit
Number of people in a meeting	300
Number of people in a private chat	250

Browsers

Teams fully supports the following internet browsers, with noted exceptions. For more information, see [Microsoft's information](#).

Browser	Notes
Internet Explorer 11	Calling and Meetings aren't supported. Users who try to join a meeting on Internet Explorer 11 will be directed to download the Teams desktop client.
Microsoft Edge, RS2 or later	Fully supported, except no outgoing sharing
Microsoft Edge (Chromium-based), the latest version plus two previous versions	Fully supported
Chrome, the latest version plus two previous versions	Sharing is supported without any plug-ins or extensions on Chrome version 72 or later.
Firefox, the latest version plus two previous versions	Audio calling, video, sharing, and meetings aren't supported. Sharing: Incoming sharing only (no outgoing). Users who try to join a meeting on Firefox will be directed to download the Teams desktop client.

As long as an operating system can run the supported browser, Teams is supported. For example, running Chrome on the Linux operating system is an option for using Teams.
