Making a Digital Hyrax Gallery

Instructions for making a digital gallery in Drupal using objects in Hyrax

This is deprecated because of Jekyll digital selections

Step-by-step guide

1. Find the series or collection you want to make a gallery for in ArcLight or ArchivesSpace and copy the ASpace Identifier. This will make a gallery for all child archival objects that have digital objects in Hyrax.
   a. I am making a gallery for the Crimson & White, so I find the Crimson & White series in the Milne School Records (https://archives.albany.edu/collections/catalog/ua659aspace_232eda0f4bc2d1cab2f69ce7b3062b1)
   b. The ID is 232eda0f4bc2d1cab2f69ce7b3062b1
2. Make a new or edit an existing Drupal page
3. Copy the following code into the Edit form:
   a. `<script type="text/javascript" src="/sites/all/themes/New_UArchives/js/headerAffix.js"></script>`
   `<script type="text/javascript" src="/sites/all/themes/New_UArchives/js/hyraxGallery.js"></script>`
   `<link rel="stylesheet" href="/sites/all/themes/New_UArchives/css/ua/oneColumn.css" type="text/css" />
   <style>
   .galleryItem {
   display: flex;
   align-items: baseline;
   margin: 10px;
   }
   .galleryThumb {flex-grow: 1}
   .galleryThumb img {max-width: 100px; max-height: 120px;}
   .galleryLabel {flex-grow: 4; padding: 20px;}
   /*.flexbox {display: flex; flex-wrap: wrap;}*/
   .loading {text-align: center;}
   </style>
   <div class="row">
   <div class="container">
   <div id="contentColumn" class="col-md-12">
   <h1 id="ID_HERE" class="seriesTitle" style="text-align:center;">Crimson and White</h1>
   <p>&nbsp;</p>
   <div id="OPTIONS_HERE" class="appendHere">
   <div class="loading"><img id="loadingGif" src="/sites/all/themes/New_UArchives/img/loading2.gif" alt="loading..." /></div>
   </div>
   <p>&nbsp;</p>
   <p>&nbsp;</p>
   </div>
   </div>
   </div>
4. Paste the ASpace ID as the id="" attribute for the <h1> tag
5. Enter options as the id="" attribute for the <div> tag with the class "appendHere"
   a. id="noYears" will not display page headers for each unique date
   b. id="noThumbs" will not display thumbnail images for large groups of objects that will load slowly. A simple bulleted list will display instead.
6. Publish the Page!
7. If you need to edit the JavaScript, the important file is here: /titus/wwwroot/sites/all/themes/New_UArchives/js/hyraxGallery.js
