Virtual Learning Space Technology and Support

Provide, maintain, and manage life cycle of virtual machine environments.

Academic Linux Virtual Machines

Computing environment for programming and compiling code for course work. Academic Linux VMs are provided at the request of the instructors-of-record for scheduled course sections.

Academic Virtual Desktop

Academic Virtual Desktop provides a virtual Windows 10 desktop that you access using a standard web browser and sign in with your UAlbany credentials. This solution is available to a small set of class sections for students without a Windows device. Your instructor will inform you if this solution is available to you.
