About EMS Web App

What is EMS Web App?

University at Albany purchased EMS (Event Management Systems) by Accruent. This software solution offers a complete suite of products including the following:

- Room Scheduling
- Academic Scheduling (including final exam scheduling)
- Event Management (including reserving services – e.g. Catering, Parking, UPD, Custodial, etc.)
- Room Utilization
- Integration with University Calendar
- Operational and Statistical Reporting
- Invoicing

EMS Web App provides a fair, transparent process for the most efficient use of University facilities.

The system can be accessed from most modern web browsers (Internet Explorer 11.0/10.0, Firefox 30+, Google Chrome 30+, and Safari).

Campus customers and UAlbany website visitors can see immediately if a space is available.

All rooms and reservations feed into a master calendar (the University's public calendars can be found at: events.albany.edu).

EMS is the system of record for academic scheduling.

Need more help? Contact the ITS Service Desk.

Questions about a particular space? See the venue management for details.

Anyone* can look at events as a Guest* and can view space availability and look for events.

University at Albany's public calendar may be found at: events.albany.edu

Need Help using the system? Please submit an ITS Service Desk Request.

Where is EMS?

Log in here.

*Off Campus Customers requesting University spaces on a regular basis may request an EMS account through an ITS Service Desk Request.

Note: all off campus users of University facilities will need to apply for a Revocable Permit.
