Wiki Formatting Macros - Progress Bar

Functionality
Progress Bar is a pair of macros that adds visualization and context for all stages of a documented process, making it easier for your users to read and navigate. Start by adding the Progress Bar Container macro then add a Progress Bar Step for each section of the process.

Recommended Replacement
There is no direct replacement for this functionality in Confluence at this time. One option is to use Status Macros in a table to illustrate the progress of your process.

Additional Information
- Status Macro Documentation
- Tables in Confluence
- Wiki markup and formatting
