Enable Blackboard Spell Check

Issue

Users are no longer able to use the built in Blackboard spell checker. In response to the increased use of Blackboard, ITS has made the spell check tool unavailable by default to significantly minimize processing load and contribute to better system performance.

Resolution

This feature can be enabled on a course by course basis by the instructor in the Control Panel:

1. From the course Control Panel select Customization / Tool Availability.

2. Find Spell Check and place a check mark in the box to make available.

3. Scroll to the bottom of the list and click Submit.

Completing this allows all enrolled users of the course to utilize the spell check in Blackboard.
